```
                G
Chorus:     The boys in the back,
            C
            Rockin' to their music,
                G
            The boys in the back,
                D
            Are all so cool,
            Em
            Talkin', never stoppin'
                    C
            All the way to school,
            Am      D           G
            Oh, the boys in the back.
```

```
G                                          G
_ It's way too early,  when the bus shows up,
                C                              D7
And we're still half asleep, feelin' kinda rough,
                      G                        G
But the boys in the back, are wearing a smile,
                D                              G
Looking at the girls, walking down the aisle.
```

Chorus

```
G                                                  G
_ It's getting louder and louder, as the bus fills up,
              C                              D
And all the kids, are finally waking up.
                        G                                 G
And the boys in the back, well, they're on their way,
                    D                          G
They're ready to go,  it's a brand new day!
```

Chorus
